

HamSCI Project Research Group

Generative AI Use Agreement
Updated 15 January 2026

As a member of the HamSCI Project research group, I acknowledge that I have been granted access to Claude.ai (Anthropic's generative AI platform) to support research activities. I understand that this access comes with important responsibilities and policy requirements.

University of Scranton Requirements

I certify that I have read and agree to comply with the University of Scranton's AI Policy, including requirements for ethical use, transparency, privacy protection, and mission alignment with Jesuit values.

Full policy available at:

https://www.scranton.edu/Governance/artificial-intelligence-policy_september-2025.pdf

Federal Agency Requirements

NSF (National Science Foundation) and NASA Requirements

1. I will disclose generative AI use in my research, including the tool name, version, and date/time of use.
2. I understand that generative AI may create risks of fabrication, falsification, or plagiarism.
3. I am responsible for the accuracy and authenticity of all research content, including AI-generated material.
4. I will not upload ITAR/EAR-restricted or other confidential/protected material to publicly accessible AI systems.
5. I understand that material that I upload to these systems can potentially be exposed to the public.

HamSCI Group Best Practices

1. **Document and cite** all AI use
(NASA format, which includes the tool name, version, date/time of use)
2. **Do not upload data that you do not have permission to upload.**
3. **Verify all outputs** – never trust AI without checking
4. **Ask when uncertain** – contact Dr. Frissell

By signing below, I agree to follow all federal and university requirements for generative AI use in research.
